

# Mingjie T'ang

Shanghai, China / +86-17681800628 / ggicci.t@gmail.com / ggicci.me

Professional with experience in BACKEND SERVICE DEVELOPMENT. Working as a fullstack engineer at Wish.

## WORK EXPERIENCE

**Software Engineer at Wish.** Shanghai, CN 11/19 - Now

Developed main parts of wishwms.cn, a Warehouse Management System. As a core component of Wish's logistics service, WishWMS is in charge of sorting, packing and delivering parcels from point to point. Met the daily export demand (1M+ parcels) of Chinese merchants.

**Software Engineer at CovenantSQL.** Shenzhen, CN 7/18 - 1/19.

Failed startup business experience. Developed the API layer of CovenantSQL database, a decentralized SQL database with blockchain features.

Built a cryptocurrency market service. Subscribed market data from exchanges and their brokers. Provided robust market data API for our quantitative trading team.

**Senior Development Engineer at Alibaba Cloud.** Hangzhou, CN 10/15 - 5/18.

Built a billing system of Alibaba Cloud CDN. Achieved functions like generating bills, checking accounts and generating resource usage reports, which are all customizable for VIP customers. Reduced manpower costs.

Built a portrait system. Painted portraits for CDN nodes, users, domains and the whole system. Served as an infrastructure for the team to inspect the product operations. Became a trusted data source to help the team for making new sales plans, cutting down operating costs, etc.

**Software Development Engineer at XunLei.** Shenzhen, CN 7/14 - 8/15.

Design and implemented the API service of the crowdsourcing-based content delivery platform in XunLei. Served as the gateway to access and manage the CDN service.

Built a deployment service for dispatching hot-spot resources to nodes. Lowered the risks of service instability for cases like massive upgrades for a game.

## EDUCATION

Northwest A&F University, 2010 - 2014 Bachelor of Software Engineering, Graduated
